**TO FISHING AND PLEASURE PARTIES.**  
THE subscriber would respectfully inform his friends and the public that he has put his fast sailing pleasure boat TREMONT in complete repair, and is ready to attend upon those who may favor him with their patronage. This Tremont is a first rate boat, (about 15 tons,) and will be built expressly to accommodate Fishing and Pleasure parties, and will accommodate from 20 to 30 persons. The subscriber has likewise a number of small boats to accommodate those who do not wish for a large boat. No pains will be spared to supply his boats with all necessary conveniences, and he respectfully solicits a continuance of that public favor which has been bestowed upon him in former seasons. The boats can be had at short notice, by leaving orders at BENJ. F. MAHAN'S, No. 71 Long wharf, where they can be furnished with stores, lines, cooking apparatus, &c. my 20 epm ANTONIO DOMINGO.

**BOSTON COFFEE HOUSE.**

CORNER OF MINT AND DEVONSHIRE STREETS.  
The subscriber takes pleasure in announcing to his friends and the public that he has taken this well known house, where he will be happy to wait on all who may favor him in a call. The house has been thoroughly repaired and furnished with new and splendid furniture—the location of the house is so well known that it needs no description. The ladder will be constantly supplied with every delicacy the season affords. The wines have been selected from the oldest and best in the city.

The subscriber has taken great care to select the best and most experienced cooks and other domestics, to attend to his wants and comforts of his customers. Gentlemen doing business in the city, and reside out, are invited to favor him with a visit. Soups will be served every day at 12 past 10. Dinners from 1 to 4 o'clock, P. M.

Cheers and parting accommodation at short notice.

A few gentlemen can be accommodated with board and pleasant rooms.

BOSTON, May 16, 1837. WALTER MC. CORBETT.

## DR. GRAHAM'S VEGETABLE PILLS.

These Pills the proprietor offers to the public the result of a long and an unswerving investigation of the Laws of the Human System. He trusts that prejudice will not raise its mighty and powerful arm against this recent and valuable discovery; and that the cry of Quackery! Quackery! will not mislead the invalid from the short and speedy road to health.

It is a common-place truth, admitted by all, but also negatively by nearly all, that most of the diseases to which the human frame is subject, are produced by excesses and irregularities of living; thereby infringing the laws which govern the several functions of the body. These are simple and plain, the object of which is as sure to bring a mortal train as the neglect of the moral laws of our nature.

The Stomach has been justly styled "the storehouse of disease." How often are parents, the natural guardians of their children's health and welfare, the immediate agents in the ruin of both. Misguided affection is sometimes the cause of this fatal error. I allude to the too common practice of gratifying children in their calls for any and every kind of food, whatever may be the constitution of the former or the nature of the latter. Its cries are choked, its stomach is stuffed with food, and that not always of the most appropriate quality. Its passively swallowing whatever is put into its mouth is mistaken for a real fondness for its food.

Report of the Committee of Diseases, and a tendency thereto in the system, is the most frequent indulgence of Animal Food, in preference to the productions of the Vegetable Kingdom. Most persons act as though the strength, vigor and health of the body rose in proportion to the load of Animal food they are capable of forcing daily into their stomach. Nature has designed that mankind should subsist upon a Vegetable Diet. This idea has maintained it. In these enlightened times, the philosopher often sinks into the man, than the man into the philosopher. Fa-hion and habit must be the ruling principle of life, and therefore nature's designs are frustrated, and foul disease, Prothrons like, infest the world in a thousand different forms.

We have every reason for believing that the fruits of the earth constituted originally the only food of man. The majority of mankind at the present day eat only of vegetables. We know that the Hindoo lives entirely upon rice and water. In Ireland the greatest proportion of the people subsist upon potatoes, with a small addition of oat meal. And where shall we find a more robust and hardy nation than the Irish? The same is true with regard to Scotland and Italy, and the parts of the South of Europe. But it is not necessary to enter into this deeply interesting question. I will only say, that I have discovered a most simple and convenient receipt for the evil and restoration. I will not say, After great hesitation I have been led by the urgent solicitations of my numerous friends, to offer the public the following:—

BRIDGET DIXON, Warren Foundry, South Boston, Mass. epm

**IMPORTANT TO THE AFFLICTED.** DR HERBERT, Member of the Royal College of Physicians Edinburgh, may be consulted on all diseases incident to the human frame. Patients who are incapable from infirmity of attending personally upon Dr H. can, by sending a particular statement of their case, be told whether they are curable or not.

Medicine without principles is an humble Art, and a degrading occupation."

Dr Herbert having arrived in America for the purpose of taking a tour through it, and seeing in every place he visited so many invalids laboring under different complaints, and so many who have ruined their constitutions by applying to advertised nostrums, respectfully informs the citizens that he has returned to the city of Boston, and intends remaining for the purpose of rendering his services to the afflicted.

Dr H. may be consulted at his apartments, No 27 Washington street, 27 near Avon Place, 21 from the morning till 3 in the evening. The Doctor will see every person who may need his advice, to much less application.

The advantages the individual has in the acquisition of a knowledge of different diseases, have been far greater than generally taught to that of an individual. From his peculiar mode of treatment, his professional celebrity has been established, and since his arrival in America, gratitude rising from a thousand hearts is and has been a sweet enjoyment.

Report of patients relieved and cured by Dr Herbert since his arrival in the U. States;—Abercrombie 36—Asthma (periodical, constitutional and spasmodic) 70—Blindness, from various causes, 58—Dropsey, in its complicated stages, 68—Fits 64—Fistula without cutting, 54—Nervous Disease, 110—Plies, 58—Rheumatism, 80—Stone and Gravel, 50—Billious Disorders, 57—Cancer and White Swelling, 68—Consumption, 60—Diseases of Infants, 68—King's Disease, 67—Gout, 52—Headache, from various causes, 73—King's Evil, 46—Liver Complaints, 51—Lumbago, 52—Sciuary, 58—Gravel, 75—Ulcerated Sore Legs, 58—Worms, 85—Paralytic Stroke, 56—Auge, 80.

Dear Sir.—A sense of justice to man and to humanity, induces me to make the following statements of facts, which you are at liberty to use in any way that you may think proper—it may be the means of inducing other sufferers to apply to you. This is to certify that I was afflicted with a disease called "Scrofula, or King's Evil, for four years, for which I was attended a long time by some of the most respectable Physicians of Boston, without receiving any benefit. Having heard of Dr Herbert's success in curing diseases, I thought I would call upon him, and did; I commenced taking his medicine, and was relieved, and was perfectly well, in a very short time a favor which was perceptible, and I now perfectly cured. With every feeling of gratitude to you, Sir, as the author of the relief I have experienced as above, I subscribe myself your obedient and ever grateful servant,

## BY THE STEAMBOAT MAIL OF WEDNESDAY.

from the improvident multiplication of banks, by the legislatures of the several states. Such a charge is exceeding illogical, as well as uncandid. Besides, one would suppose that men would hardly be willing to urge the necessity of a national bank as the only means of guarding against their own improvidence in throwing into circulation an excessive amount of money, and the prodigal use afterwards to be made of it.

The view here taken of our subject derives much support from the fact, that the severe pressure which is experienced in this country, is now felt to an equal, if not a greater extent in England, and other portions of the world.

Business in England as here, is at a dead stand. Merchants and bankers are failing, and the poorer classes are suffering with hunger, and yet they have a national bank, and have had no specie circular. The embarrassment, therefore, which is now felt in England, must of necessity have been brought about by other causes than those by which it is said ours has been produced. And as like effects are fairly referable to like causes, the simultaneous suffering in England, and in this country, of the same nature, and to a like extent, may fairly be attributed to the same common cause; and that is the OVER TRADE that has been carried on both here and there. Thus we speak of as the proximate cause—as the link in the chain immediately connected with the effect.

And now let us suggest, in conclusion, that, notwithstanding the diversity of our occupations, our circumstances, and our political opinions, we are citizens of the same common country, and have the same common interest at stake. The same fathers achieved our independence, and we are heirs of a common inheritance, rich and lasting, if not rashly forfeited. If there ever was a time when angry passions should be lulled, and a spirit of farce and mutual good will cherished, it is the present. Our Government need our support. They have a right to look to us for counsel and sympathy in this time of extreme embarrassment and perplexity. But at least, let us ask that that spirit of disaffection which has so often broken out in harsh denunciations against them, may give place to those kinder sentiments of confidence and esteem which we are sure a candid examination of their conduct and motives cannot fail to inspire.

Some "Irish Echoes" for the amusement of the *Atlas*.—Who denounces speculators in Public Lands?

Daniel Webster.

Who is one of the largest of these speculators?

Daniel Webster.

Who denounces the deposite banks for lending money to speculators in Public Lands?

Daniel Webster.

Who has borrowed money of them for this purpose?

Daniel Webster.

Who owes the deposite banks?

Daniel Webster.

Why was n't the proposition in Congress to have the names of its members published who had borrowed money of the deposite banks to buy Public Lands, carried?

Because one party was found to be as deep in the mud as the other was in the mire.

Who was in up to his chin?

Daniel Webster.

Mr. Ingersoll has made a report to the Convention sitting at Harrisburg, for the purpose of amending the Constitution of that State, so forcible, so full of truth, and so irrefutable, that the whigs are afraid to have it printed, and combined to prevent its taking the regular course of such papers. It recommends that there shall be no bank in Pennsylvania after 1842, with a capital exceeding blank millions of dollars; that all bank charters shall be repealable by law; that after 1841, no bank shall ever issue a note of less denomination than \$20; that no bank shall discount till the whole capital shall be paid in, one third of which shall be in gold and silver; that no bank shall discount more than 50 per cent; beyond its capital, nor ever divide more than 7 per cent.; that they shall have no preference or priority in the payment of debts, and that all the stockholders shall be liable, in their private property, for the debts and liabilities of the bank.

The Post mentions "a man named Hale." Just as if the Post did not know "Jim." What shocking ignorance!—Transcript.

We know Mr. James Hale, formerly connected with Mr. Topp's Room, but he is too sensible and respectable a man, we should think, to attempt what the New York buck says he shall try to do.

The Journal of Commerce says that "the State Bank system, was, no doubt, unforeseen by the federal Constitution and the early State Constitutions, and is contrary to its spirit and object, if not to its letter." If this had been uttered by a democrat the whigs would have cried out "crucify him."

Latest from Tampa Bay.—The Savannah Republican states, that from information derived through an officer of the army, direct from Tampa Bay, it is certain that the Indians have all left the country about the Suwanee and Withlacoochee Rivers, and that they are in the neighborhoods of Tampa, Lake Monroe, and Cedar Swamp. The chiefs are at two camps within twelve miles of Tampa. The Indians come and go at pleasure, but are timid and suspicious.

From Jamaica.—By the John W. Cater, Capt. Crane, from Kingston, Jam., we have been favored with papers to the 13th inst. It appears that a drought prevailed to a great extent in most of the parishes, which it was feared would prove injurious to the sugar crop.

A meeting was held at Spanish Town on the 9th inst. to adopt a scale of labor for apprentices, but it was found impossible to adopt one uniform scale of labor over the Island. It was agreed that each parish should adopt such a scale as should be agreed upon by master and apprentice.

From the Kingston Despatch of the 3d instant, we learn that the small pox had not disappeared from Grenada. On the 25th March there were sixty three cases of small pox in the town of St. George. In Trinidad vaccination was indiscriminately performed gratis; and was universally used as a preventive means to arrest its progress. The infection, and of a malignant character, was introduced into Tobago. Vaccination has been also attended to at Barbados, where it is performed by the medical gentlemen gratis.

On the 5th ult. the Bermudas were visited by a severe tempest, which tore up trees, unrooted houses, and did much injury to the shipping in the harbors.—N. Y. Post.

The Bank presses insist that the present state of things proves the unsoundness of General Jackson's views in reference to the currency.

General Jackson is in favor of a specie currency. The pseudo whigs are in favor of a paper currency. Now, which has failed—the specie currency or the paper currency?

Which do the people prefer?

The millions who compose the American people will tell the bank gentry, that the present state of things most signally confirms the soundness of the views entertained by that hero, patriot and statesman whom they will never forget.

Right.—A party of young bloods who got into a row in Charleston, S. C. and fired pistols, &c. have been sentenced by the Court to pay a fine of \$200 each and to be imprisoned for one month.

Right.—John Quincy Adams has accepted an invitation to deliver an oration at Newburyport, on the Fourth of July next.

Important.—Toledo Mail Sales.—We are authorized to say that at the extensive sales of Messrs. COMSTOCK & PALMER, advertised to take place in this city, on the 16th of June, the *BILLS OF ALL SOLVENT BANKS*, throughout the country, will be received in payment, notwithstanding the institutions from which they were issued, may have, for the time being, suspended specie payments. This arrangement, it is hoped, will, in some measure, do away the inconvenience and embarrassment to which many who purpose settling in this region of country, would otherwise be subject by the existing arrangement on the part of government, to receive nothing but specie in payment for the public lands.—*Toledo Blade*, May 23.

Last evening (Wednesday) between eight and nine o'clock, a daring attempt was made to set fire to the block of stone buildings on the corner of Washington and Court streets. Some villain went into the attic immediately over the office of Z. Cook, Jr., and placed a broom upright so that its top touched the inside of the roof. On the top he put a quantity of paper and other combustibles and set fire to the quantity. When discovered, the roof was burnt through and the flames were issuing through the spout. It was soon extinguished.—Trans.

The Oratorio by the Boston Academy of Music was well attended last night. Another one will be given tomorrow evening.

The New York market is very fluctuating. U. S. Bank Stock sold in New York on Tuesday for 104—Worcester Railroad 92. Paper is nine per cent. below the par of American gold. It is said \$77,400 in specie arrived on Monday from New Orleans. The Charleston, S. C., Richmond, Va., Alexandria, D. C., and Baltimore markets appear to be reviving a little. The Charleston Courier of the 26th ult. says—

"A somewhat better feeling begins to pervade our commercial community, and we notice more stability in our market the past week, than we have been able to record for some time back. In some articles there is a shade of improvement in prices. Exchange on England from 10 to 12 per centum premium."

Flour is selling from the wagons in Baltimore at \$8.50, for the same at Alexandria, and at \$8 in Richmond.

*Auction Row.*—The auction store at the corner of Pearl street and Maiden Lane, was disturbed by a sort of riot yesterday afternoon. A man bid off some fancy articles, and as they were knocked down to him, he was about to turn them on the counter to count the pieces for which he was to pay, when the auctioneer forbade him, and his blood getting up, he dashed the box and contents on the floor. A rush was made and he was pushed out of the store, which being perceived, all the clerks, porters, &c. in the neighborhood rushed to the rescue, and a general battle commenced. The auctioneers of the same stamp near, with their clubs came up, and the merchants' clerks whose employers' customers had suffered by various auctioneers, dashed in. Bloody noses and black eyes were for some time the disorder of the day, and the windows and doors of the auction store were smashed in. Several persons were seriously injured.—*N. Y. Post*.

Our New Orleans dates are to the 22d inst.—Mobile to the 23d, other places to the regular time.

From Mexico.—By an arrival at New Orleans, from Mexico, with accounts from Tampico to the 6th, and the city of Mexico to the 1st instant, we are enabled to give a few interesting items.

The Mexican Cabinet was definitely settled on the 24th ult., by the appointment of the following "Sicces":

General Mariano Michelena, as Minister of War; Manuel de la Peña Pena, of the Interior, and Joaquin Lebrilla, of Finances. Angel Maria Morales as Councillor of State. General Gundaloupe Victoria, Military Commandant of the Department of Vera Cruz. General Vicente Filisola to have command in the expedition against Texas.

The vessels mentioned yesterday by us as detained by the Mexican authorities at Brazos Santiago, in the 14th ult., under pretence of the acts of the Sloop of War Natches, it appears were permitted to proceed to sea. A Metamora paper states that the cause of their detention was the presence of the Natchez, but that vessel having disappeared, the occasion of their detention had ceased. An American frigate afterwards appeared at the mouth of the Brazos, and put to sea again before her name or object could be ascertained. The commander-in-chief had visited the line of defences on the coast.

The Matamora paper states, that an attack was made on the town of Bexar, by a body of Texans, but meeting with resistance, they retired, after setting fire to the town.

It seems that Mr. William H. Wharton, the Texian Minister to the United States, was made prisoner on board the schooner Independence, was treated with generosity by the Mexican commander-in-chief, and was carried to head quarters for safety.

It is said that Bustamante is collecting the correspondence between the President of the United States and Santa Anna, with the view of trying the latter as a traitor, and punishing him according to law.

The quantity of specie imported into New Orleans on the 20th and 21st, is variously stated at \$204,498 and 230,000. Our own belief is, that the latter is nearest the mark. Much more would have reached there had not the situation of Mexico forbade the risk of transportation through the St. Louis Isthos. As it is, a large sum, probably a million or more, will have to come by way of Vera Cruz.

*Texas Consul for New Orleans.*—Nathaniel Townsend, Esq. has been appointed to this station.

The Commercial Bank of Macon; the Bank of Columbus; the Insurance Bank of Columbus, the Commercial Bank of Natchez, and the Commercial Bank at Vicksburg continue to pay specie.

Thirty nine Custom Bonds laid out at New Orleans on the 22d inst., their amount not known. Bonds to the amount of \$9,000 were paid in specie. All debentures were paid in specie.

The very worst feelings exist between the citizens of Mississippi and those of New Orleans: very many of the Mississippians who visit N. Orleans, are thrown into the Calaboose; the walls of that establishment are chalked over the coals!"

On the 1st of July next the Knickerbocker will commence its tenth volume. Within the brief space of a little more than two years and a half, the number of copies issued has been increased from less than five hundred to more than four thousand. This is the strongest evidence which could be offered in favor of the merits of this popular Magazine. The great variety embraced in its contents—the light, the grave, the kind, and the severe—admits it to all classes, while it presents a faithful mirror of the literature, sociability, and fashions of the age.

Dr. Bartlett's Letter to the Massachusetts Medical Society is published this morning, and is for sale at the bookstores. It is written with great power and in a finished style of composition, and applies a caustic to the President, Counselors and Fellows, which will make them hot. We shall allude to it again.

The door-keepers of the National take a benefit this evening, and no doubt their assiduous and courteous attention to their duties will not be overlooked by the patrons of that theatre. The Carpenter of Rouen and the Farmer's Son, form a fine bill for the occasion.

They can't keep their convicts in their Penitentiary in Georgia.

There is a report that Kendall has bought the Sun. We presume as he is flush, he will try and be the moon and seven stars. It all averts not.—*Evening Star*.

True enough Mr. Star. Kendall has bought us, and at a much cheaper rate, too, than Biddle bought you and Webb. He has secured our humble services by his unflinching fidelity in the administration of laws, in opposition to the band of rascals of the day, and the jests and jeers of the hired bank presses.—*N. Y. Sun*.

The Suffolk Bank proscribes the Rhode Island bank bills, and our newspapers set them down among the doubtful banks. Now, the fact is, the Rhode Island banks are the safest in the whole country. Their stockholders are all liable, and in a measure the property of the State is thus pledged to pay their debts. It would be much more reasonable for the Rhode Island banks not to receive bills of Massachusetts banks, than the reverse. Nobody need be afraid of the Rhode Island bills. They will redeem their notes should all other banks stamp.—*Advocate*.

*Connecticut State Prison.*—During the past year, the commitments have been 57. The year previous they were 66. Fifty one convicts have been discharged, during the year. The present number is 207. The prisoners have been remarkably healthy during this year, and only one has died. The balance gained to the Institution, for the year, is \$7,435.94. The profits of the prison, since its establishment, have been \$5,756.45 more than its entire cost, together with all the improvements, and alterations, and land connected with it.—*Express*.

The debt of the city is now \$1,497,200; in 1832 it was \$817,123.93; increase in five years \$880,076.07.

At this rate our city will soon be owing more than it is worth, as is the fashion now-a-days.—*Advocate*.
